

Club Ayurveda Website Developer Brief

Final recommended information architecture and content requirements for a five page website

Project decision

Build a five page responsive website for Club Ayurveda. The website must introduce Dr. Sayali M. Deshmukh, explain the clinic's five treatment areas, promote and sell Shata Dhauta Ghrita, and convert visitors into consultation or product enquiries. The five main pages should be Home, Treatments, Product, About and Contact.

Brand and clinical profile

Item	Approved direction
Brand	Club Ayurveda
Lead doctor	Dr. Sayali M. Deshmukh
Qualifications	BAMS; PGDCC; training in Diet and Obesity Management; experience in Clinical Cosmetology and Panchakarma
Primary positioning	Ayurveda, skin and hair care, Panchakarma, diet and personalised wellness consultation
Tone	Professional, reassuring, premium and easy to understand
Preferred public wording	Use client or wellness member where suitable. Avoid exaggerated cure language.

Recommended sitemap

Page	Primary purpose	Main action
1 Home	Introduce the brand, feature the product, present Dr. Sayali and summarise treatments	Shop now or book consultation
2 Treatments	Explain the five treatment categories and consultation approach	Book consultation
3 Shata Dhauta Ghrita	Provide product details and enable online purchase	Add to cart or buy now
4 About	Build trust through Dr. Sayali's profile, qualifications and Club Ayurveda's approach	Meet the doctor or book consultation
5 Contact	Collect enquiries and provide appointment, WhatsApp and location options	Submit enquiry or WhatsApp

Page 1 Home

The home page should establish trust within the first screen and direct visitors toward the two main conversions: buying the product and booking a consultation.

- Header with logo, Home, Treatments, Product, About, Contact, Shop Now and Book Consultation.
- Hero section with a premium Shata Dhauta Ghrita image, short product introduction and Shop Now button. A secondary Book Consultation button should remain visible.
- About Club Ayurveda with a short explanation of personalised Ayurvedic care.

- Meet Dr. Sayali M. Deshmukh with professional photograph, short qualification line and link to the About page.
- Treatment overview using five clear cards: Skin and Hair, Digestive Disorders, Liver and Kidney Related Issues, Weight Management and Diet, and PCOD and PCOS.
- Featured product section with product photographs, price placeholder, short description and Buy Now button.
- Why choose Club Ayurveda covering personalised consultation, doctor guided plans, Ayurveda based care and follow up support. Publish only services that are actually available.
- Testimonials section using verified client feedback and written consent.
- Final consultation call to action followed by footer contact details, quick links, policies and social links.

Suggested home page copy direction

Headline: Personalised Ayurvedic Care for Skin Hair and Complete Wellness

Supporting copy: Consult Dr. Sayali M. Deshmukh for Ayurveda based care plans designed around your health concerns, lifestyle and wellness goals.

Product headline: Discover Club Ayurveda Shata Dhauta Ghrita

Product supporting copy: A traditional 100 times washed ghee moisturiser created for a nourishing and soothing skincare ritual.

Final wording must match the approved product classification and label.

Page 2 Treatments

Use one overview page with five anchored sections. Each section should explain common concerns, the consultation process and an appointment call to action. Do not promise guaranteed results or claim to cure a disease.

Treatment area	Topics to cover
Skin and Hair	Acne, pigmentation, dry skin, hair fall, dandruff and scalp concerns. Explain Ayurveda and lifestyle based assessment without guaranteeing outcomes.
Digestive Disorders	Acidity, gas, bloating, constipation and digestion related concerns. Explain history taking, diet review and personalised recommendations.
Liver and Kidney Related Issues	Supportive Ayurveda and lifestyle consultation. State clearly that serious or diagnosed conditions require appropriate medical evaluation and coordinated care.
Weight Management and Diet	Personalised diet plans for healthy weight loss, weight gain and lifestyle management, with realistic goals and follow up.
PCOD and PCOS	Consultation for menstrual, metabolic and lifestyle concerns associated with PCOD or PCOS. Avoid cure guarantees and include referral guidance when required.

Page 3 Shata Dhauta Ghrita

This page must function as a complete e commerce product page. The home page promotes the product; this page provides the information required to purchase it.

- Product gallery with clean front image, luxury image, natural Ayurveda image, open jar texture image and optional short video.
- Product name, net quantity, MRP, selling price, stock status and quantity selector.
- Add to Cart, Buy Now and WhatsApp enquiry buttons.
- Short description explaining what Shata Dhauta Ghrita is. Use the approved label spelling consistently.
- Benefits limited to approved cosmetic or licensed Ayurvedic claims.
- Complete ingredient list, directions for use, patch test instruction, storage, warnings and external use statement.
- Manufacturer, marketer, licence, batch, manufacturing date, expiry and customer care information as applicable.
- Shipping, return, refund and cancellation summary with links to full policies.
- Frequently asked questions and verified reviews.

Page 4 About

- Club Ayurveda introduction and purpose.
- Professional profile of Dr. Sayali M. Deshmukh.
- Qualifications: BAMS, PGDCC, Diet and Obesity Management training, Clinical Cosmetology and Panchakarma experience.
- Areas of focus: Ayurveda, skin and hair, digestive wellness, diet and weight management, PCOD and PCOS, and supportive care for liver and kidney related concerns.
- Consultation approach: history, assessment, personalised plan and follow up.
- Professional photographs and relevant certificates only after checking that they may be published.

Page 5 Contact and Book Consultation

- Appointment form with name, mobile number, email, city, consultation mode, primary concern, preferred date and consent checkbox.
- Click to call and WhatsApp buttons.
- Clinic address, timings and map after these details are confirmed.
- Online consultation option if available.
- Emergency note stating that the form is not intended for urgent medical care.
- After submission, show confirmation and send the enquiry to the authorised Club Ayurveda contact.

Design direction

Area	Requirement
Visual identity	Use the official Club Ayurveda logo. Base the palette on white, lime green, warm neutral shades and restrained gold accents.
Style	Clean premium Ayurveda and clinical wellness. Avoid a crowded herbal shop appearance.
Typography	Use a readable modern typeface with strong heading hierarchy. Keep body copy comfortable on mobile.
Photography	Use authentic professional photographs of Dr. Sayali and the approved product images. Avoid misleading stock images suggesting guaranteed results.
Mobile	Design mobile first. Keep consultation and shop actions easy to reach without covering content.
Accessibility	Provide readable contrast, alt text, keyboard navigation, labels for forms and descriptive buttons.

Functional requirements

- Responsive design for mobile, tablet and desktop.
- Secure product checkout with an approved payment gateway.
- Cart, order confirmation and basic order notification flow.
- Consultation enquiry form with spam protection and consent capture.
- WhatsApp, phone, email and social links.
- Content management access so the team can update products, prices, treatments, blogs and testimonials.
- Basic analytics, Search Console setup and conversion event tracking.
- SSL, backups, image optimisation, caching and acceptable page speed.
- Privacy Policy, Terms, Shipping Policy, Return and Refund Policy, Cancellation Policy and medical disclaimer.
- No medical records or sensitive health documents should be collected through a general contact form unless a suitable secure workflow is implemented.

SEO and content setup

- Create a unique page title and meta description for every page.
- Use one clear H1 on each page and descriptive H2 headings.
- Add structured product data, price, availability and review data only when accurate.
- Add LocalBusiness or relevant healthcare schema after clinic and registration details are verified.
- Use descriptive image filenames, compressed WebP or AVIF formats and meaningful alt text.
- Prepare future SEO detail pages for each treatment category without adding them to the initial five page scope.

Information required before development

Required item	Status or decision needed
Official contact details	Confirm phone, WhatsApp and email
Clinic details	Confirm address, map location, timings and consultation modes
Doctor profile	Approve final biography, qualification wording, registration details and photographs
Product details	Confirm final product spelling, classification, net quantity, ingredients, MRP, selling price, directions, warnings and licence information
Payments	Select payment gateway and settlement account
Delivery	Confirm serviceable locations, shipping charges, dispatch time and courier process
Policies	Approve privacy, terms, shipping, cancellation and return or refund rules
Testimonials	Provide verified testimonials and publication consent
Domain and hosting	Confirm domain name, hosting owner and administrative access
Languages	Confirm English only, Marathi only or bilingual website

Developer delivery checklist

- Provide mobile and desktop designs for approval before full development.
- Use a staging link for content and checkout testing.
- Test forms, WhatsApp links, payment flow, transactional notifications and policy links.
- Test the website on current Chrome, Safari and Edge browsers and common mobile sizes.
- Provide admin login, source or platform ownership, backups and a short handover guide.

- Do not publish treatment claims, product claims, prices or licence details until Club Ayurveda gives written approval.

Recommended development sequence

1. Confirm the missing business, clinic and product information.
2. Approve sitemap, wireframes and visual direction.
3. Approve final page copy and product compliance wording.
4. Develop the five pages and e commerce flow on staging.
5. Complete mobile, form, payment, policy, SEO and performance testing.
6. Publish after final written approval and provide access handover.
